

QUALIFYING ROUND: SET TAPE-DOWN

THE CHALLENGE

This challenge involves four team members working together, taping out specific items detailed on a provided ground plan.

Using two tape measures, a scale ruler, and provided rolls of tape, the designated items from the ground plan must be taped out on the floor, using the given center and plaster lines as a point of reference.

Note that you may be asked to tape solid shapes (with a solid line of tape), as well as some spike marks (corners or X spikes).

This is a timed event. Penalties will result in added time.

The team with the fastest time (including any penalties) will receive 50 points; second fastest, 49 points; third fastest, 48 points; and so on. No team successfully completing the challenge will receive fewer than 20 points, regardless of the number of teams participating.

REQUIRED SEQUENCE

Preset: Tape, tape measures, a scale ruler, and a provided ground plan are on a table, adjacent to clear floor space with an indicated plaster line and center line.

The tape, tape measures, ruler, and the supplied ground plan must remain on the table until the referee calls start.

Once time starts, tape out indicated elements from the ground plan, according to scale and in relation to the plaster and center lines. These may include walls, platforms, level changes, furniture spikes, and performer spikes.

When your team feels they have completed the assignment, return the tape, tape measures, ruler, and ground plan to the table and stop the clock.

You will need to return any unused tape that was removed from the roll (tape removed from the roll cannot be put back).

The referee will then check your work for accuracy and add any penalties to your time.

POTENTIAL PENALTIES: Going out of sequence; Any action deemed unsafe; Any indicated elements from the floorplan that are missing; Any indicated elements from the floorplan that are out of place; Any indicated elements from the floorplan that are not to scale; Any excess/unnecessary tape on the floor (penalized per inch); Any unused tape that was removed from the roll but not used in the floorplan; Any unused tape that is crumpled; Disregard for the spirit of the event or objectives of the exercise.

Equipment used in this event: Scale ground plan with indicated elements to be taped out; rolls of tape; 2 tape measures; scale ruler.
